

What challenges did you encounter with this assignment, if any?

Ans. I am not that well versed with Python. I am more of a Java guy. That was the only difficulty.

What did you think about the requirements specification for this assignment?

Ans. Pretty straightforward.

What challenges did you encounter with the tools?

Ans. Again, pretty straightforward. Since I had previously used TestNG with Java, I knew what the end goal was.

Describe the criteria you used to determine that you had sufficient test cases, i.e. how did you know you were done?

Ans. Just made test scenarios for each type of triangle and ensured they were satisfying positive and negative scenarios.
